

STAY CONNECTED. STAY PROTECTED.

LUNAR: PART OF THE MSA CONNECTED FIREFIGHTER PLATFORM

The future of firefighting is here with LUNAR, the latest in search and rescue technology.

FIREFIGHTING ASSISTING SEARCH TECHNOLOGY (F.A.S.T.)

F.A.S.T. combines direction and distance information with thermal imaging to help find separated teammates and decrease response time.

PERSONAL THERMAL IMAGING

Personal thermal imaging with edge detection identifies hot spots and ventilation points, improving situational awareness and making it easier to navigate through environments with low visibility.

STAY CONNECTED

A direct cloud connection enables an always-connected experience for individuals on-scene and remote. LUNAR's integrated LTE-M allows for connection to FireGrid—and easily accessible cloud-based software providing data insights all in one place.

ACCOUNTABILITY FOR EVERYONE

With advancements in technology, accountability in fire service can go beyond how we think of it today, extending to visibility of all users, equipment maintenance, and incident reporting. With LUNAR, these tech elements are all wrapped into one device that each firefighter can have at all times.

WHEN YOU GO IN, WE GO IN WITH YOU.

WHY CONNECTIVITY?

Emergencies happen. The ability to connect to your team can be the difference in a rescue mission. As part of the Connected Firefighter Platform, each LUNAR device is equipped with the LUNAR-to-LUNAR network, which independently connects between devices. This helps to provide confidence that you are informed and your team is connected when the unexpected happens.

MORE FROM THE CONNECTED FIREFIGHTER PLATFORM

firegrid

From the moment a firefighter jumps off the rig, FireGrid Cloud-Connected Software feeds incident and firefighter data to on-scene officers and remote personnel in real-time, ensuring everyone back at the station knows what's happening on the ground.

HUB

The MSA HUB provides a wireless gateway to the cloud, enabling wireless on-scene data for local and remote Incident Command for additional eyes on the scene and a more seamless post-incident evaluation.

G1 SCBA

A key part of the Connected Firefighter Platform, the G1 SCBA is compatible with other MSA equipment including the all new LUNAR—a handheld search-and-rescue device. When connected to LUNAR, key SCBA data, like air status and alarm information, are available to Incident Command and archived in the cloud.
