

QUICK ATTACK

KME Quick Attack units are multi-purpose apparatus, capable of not only Wildland attack, but can also function as light rescue, initial attack, or medical support apparatus.

OUR VEHICLES CONNECT AND PROTECT
PEOPLE AROUND THE WORLD EVERY DAY.

QUICK ATTACK

Designed to Move Quickly Where Larger Apparatus Cannot.

KME's Wildland apparatus feature heavy-duty suspensions and tread plate bodies for durability off-road. Several base models include flatbed bodies, patrol bodies, and full light rescue style bodies. KME has a full library of options, including portable gas and diesel driven pumps, tank sizes, discharge locations, and off-road modifications. These units share the same design lineage with your larger units, so they will fit right at home with the rest of your KME fleet.

FEATURES

- Safety and Reliability Built in Every Unit
- Designed to Provide the Lowest Center of Gravity
- Custom Designs to Meet Every Quick Attack Response Requirement
- Painted Aluminum, Tread Plate Bodies, or Compartments Available
- Chassis Options Include Brush Guards, Winches, Lift Kits and Side Steps
- Departure Angle Features
- Side and Rear Receivers for Portable Winches
- On-Site Tilt Table Testing Available to Verify a Safe Overall Design

DESIGNED TO TAKE A BEATING

Designed to travel off road fearlessly, and, well-equipped to accomplish whatever task is ahead. KME Quick Attack Units will always perform to your requirements.

PUMP VERSATILITY

No matter if you need the pump built into the body, separate pump module, pump on slide-in unit or a separate engine driven pump, KME can design your ultimate Quick Attack.

OPTIONS TO CUSTOMIZE

Maximize your compartments, taper the rear to enhance departure angles, utilize rubber fenders to avoid off road damage or add fender storage, is just the beginning of the available options for your unit.
