IN-FIELD SERVICE CAPABILITIES

OUR SERVICE FLEET & ON-SITE SERVICE OPTIONS

Our Service Fleet

- Eight Fully Equipped Service Trucks
- EVT Certified Technicians
- NFPA 1911 Certified Technicians
- In Fire Station Service Support
- Courtesy Truck Inspections
- Preventive Maintenance Services Performed In Field
- New Truck Familiarization & Training

When a fire apparatus is not running for an unforeseen repair, it's as if a member of the fire department has called in sick. So we understand the immediate effect that has on your fleet's responsiveness.

This is all part of why Sunbelt Fire can come to you and make many repairs and service calls at your station or facility. Our extensively trained and certified technicians stand ready to arrive at your location in one of our dedicated service vehicles, to get your apparatus up and running in the least amount of time possible.

And if your repairs happen to be serious enough to warrant in-shop service, our bonded and insured service team can take care of the transportation to-and-from our Service Center as well.

PUMP TESTING SERVICES

AVAILABLE ON-SITE OR AT OUR LOCATION

Fire Pump Testing

Sunbelt Fire's 25,000 gallon pump testing facility in Fairhope, Alabama allows us to perform comprehensive pump testing on any apparatus to NFPA 1911 specifications.

NFPA 1911 - 18.2 Frequency

Performance tests shall be conducted **at least annually** and whenever major repairs or modifications to the pump or and component of the apparatus that is used in pump operations have been made.

- In-Ground Test Pit & NFPA Test Equipment
- Testing up to 3000 GPM
- NFPA #1911 — Annual Pump Testing
- NFPA #1901 — Acceptance Pump Testing
- Aerial Ladder Waterway/Monitor Testing
- Foam System Testing
- Full Service Inspection Documentation
- Fully Insured in Station Service Operations

Field Service Pump Testing

Need to keep your “out of service” time to a minimum? Sunbelt Fire can come to your location for pump testing with our On-Site Certified Pump Testing mobile test trailer. All pump testing, whether at our facility or at yours, are performed by EVT certified technicians who continuously undergo rigorous training from Hale, Waterous, and Darley pump schools, so that they understand both testing and service of your pumps... no matter who built them!

- Test Multiple Units On-Site!
- Most modern test trailer in USA
- Certified Test Gauges & Manometer
- Test Pressure Governor or Relief Valve
- Foam System Testing in Field
- Monitor & Discharge Testing
- FREE Courtesy Inspection of Entire Vehicle

APPARATUS REPAIRS & UPGRADES

AS GOOD AS NEW, OR BETTER!

NFPA Standards

Upgrades (#1901 Annex D):

“It is recommended that apparatus greater than 15 years old that have been properly maintained and that are still in serviceable condition be placed in reserve status & upgraded in accordance with NFPA 1912, Standard for Fire Apparatus Refurbishing, to incorporate as many features as possible of the current fire apparatus standard. Because the changes, upgrades, and fine tuning to NFPA 1901, there have been truly significant, especially in the area of safety. Fire departments should seriously consider the value or risk to fire fighters of keeping fire apparatus older than 15 years in first-line service.”

Refurbishment (#1912):

Level #1

Upgrade to “As Purchased” NFPA standards

Level #2

“Major Refurbishment” with substantial changes and improvements.

In addition to mechanical repairs, inspections and preventive maintenance that keeps your trucks running smoothly on the inside, Sunbelt Fire also can be your one-stop service center for all your apparatus’ exterior needs as well. We offer full collision repair services, including cosmetic/ paint and graphics restoration. Our EVT certified technicians can also upgrade your current equipment, and even completely refurbish an old vehicle. Just some of our upgrade options include:

- Warning Lights and Light Towers
- Scotchlite Chevron
- Seat Belts, Steps, Handrails
- Step and Ground Lighting
- Hose Bed Covers
- Generators and Foam Systems

Call us today for an upgrade or refurbishment quote on your apparatus • 800-642-8484 • SunbeltFire.com
