Our Commitment to Service

At Sunbelt Fire, we understand the critical mission in having your MSA SCBAs and your breathing air equipment in "perfect" operating condition. It does not matter if it is just a minor repair, basic maintenance, spare parts, or a critical repair of your Bauer air compressor, or a complete new installation of a Bauer system, we are ready to meet your needs.

The Sunbelt Fire Breathing Air Service team is certified in the most up to date training techniques and service certifications for MSA and Bauer. They undergo continuous updates to maintain your SCBA and train your fire department operators in filling, cleaning, and general maintenance of your equipment.

Call us today to see how we can serve your fire department!

Sunbelt Fire can help you ensure that your breathing air equipment is meeting critical maintenance & operational standards; while providing you with the peace-of-mind that your MSA and BAUER components are in the best possible condition and ready for the next call.
