GPM PUMP

Commercial tankers are NFPA compliant and built with the same proven technology and superior quality associated with all E-ONE apparatus. E-ONE tankers are rugged yet compact, easy-to-operate vehicles designed to meet demanding suburban, rural and urban-interface operational needs.

## RUGGED YET COMPACT

Commercial tankers are manufactured with the same proven technology and superior quality associated with all E-ONE apparatus. E-ONE tankers are rugged yet easy-to-operate vehicles designed to meet demanding suburban, rural and urban-interface operational needs. E-ONE commercial tankers are available on two- or four-door Freightliner®, International® or Kenworth® chassis with all-welded extruded-aluminum body and poly tanks. Tank designs range from full width or narrow, rectangular wetside or dryside and tank sizes range from 1500- to 3500-gallons with stainless steel plumbing. Commercial tanker pumps range from 500- to 1250-GPM in side-mount modules or under tank configurations.

When the scene demands large amounts of water, the E-ONE Tankers answer the call.

# COMMERCIAL TANKERS

## CHASSIS

- Freightliner®, International® or Kenworth® chassis
- Up to 450 HP Engine
- Two-door, two-door extended, or four-door cabs
- Two-tone cab paint
- Air conditioning
- 50-gallon aluminum fuel tank
- Allison® transmission with touch-button shifter

## BODY CONSTRUCTION

- Wet-side or full-dry side body configurations
- 3/16" extruded aluminum design
- 1500 to 3500 gallon tank capacity with integral foam cells available
- Full depth lower compartments for generous storage of large items
- Options include: hinged or roll-up doors, adjustable shelves, roll-out trays, tool boards and SCBA storage
- Adjustable ladder and hard suction racks
- Manual or electric portable tank racks
- Up to 80 cubic feet of hose bed storage with NFPA compliant hose bed cover

## FIRE PACKAGE

- Side mounted or under tank pump panel configurations with stainless or Zolotone™ finishes
- Up to 1250 GPM with NFPA rated discharges
- PTO or split shaft pumps
- Pump and roll available
- Manually operated rear tank dump with directional chute
- Rear and side electrically actuated tank dumps with slip-on extension and directional chutes are available
- Customizable discharge and preconnects
- Popular options: Front bumper jump line with storage tray and top-mounted booster reel with hosebed storage pan

## ELECTRICAL

- Multiplex electrical system provides increased feature capability and improved diagnostics
- Whelen® optical and audible warning packages standard, others optional
- 12-V scene lighting and back-up camera available
